Partner With MCPER to Improve Math and Literacy Instruction!

MCPER Approved to Support Strong Foundations Planning Grant

The Meadows Center for Preventing Educational Risk (MCPER) has been approved by Texas Education Agency to support its Strong Foundations Planning Supports Grant. **The Strong Foundations program supports local education agencies in creating and implementing a research-based math and/or literacy framework.**

MCPER partners with districts across Texas to ensure that instructional priorities align with current research. Specifically, we help districts identify and implement research-based teaching strategies, develop a comprehensive instructional framework, identify high-quality instructional materials across the curriculum, and create a communications plan that will foster buy-in and support learning.

Benefits of working with MCPER:

- We leverage high-quality research to improve educator and student outcomes.
- We embrace unique cultural and contextual factors that influence the way students learn.
- We work collaboratively with all stakeholders.
- We operate with clear lines of communication that promote a culture of transparency.
- We disseminate accurate information in a way that promotes positive change.
